## Notes.

In the Reductions of Fractions, as respects the Remainders from the Different Denominations, It is often necessary to vary their terms In some cases by Multiplications, in Others by Reductions.

### Examples.

$\frac{16}{28}$  is equal to  $\frac{8}{14}$  and  $\frac{8}{14}$  equal to  $\frac{24}{42}$ , therefore by dividing  $\frac{24}{42}$  by 3 you find  $\frac{8}{14}$  by multiply<sup>g</sup>  $\frac{8}{14}$  by 2 you find  $\frac{16}{28}$ . Into which you may divide quarters.

---

---

---

To Reduce quarters to 28. will be <sup>the</sup> necessary to add with 7 <sup>the</sup> or 42<sup>st</sup>.

## Telegraphy

An Ensign with the Union down

### Explanation

The Triangle will only be ~~signified~~  
made use of at the South Yard-Arm  
when Telegraphy is actually commene-  
ced and Continued till the Intelligence  
Intended to be Conveyed is at an End.

Not having any Signification itself  
as it will not be found to interfere  
with any of the Numerical or Alpha-  
betical Signals required to be Made.

The Colours of the Flag or Pendants  
made use of are of no Consequence  
— Whatever —

With 2 Guns, for the Approach of an Enemy  
Signifies the Enemy's Fleet is Out

### Instructions

The Flag and Balls, forming any signal must be hoisted and lowered at the same time, when the White Ball is hoisted at No 2 Block House, the Communication will commence - If a Signal the Ball will be lowered as soon as it is perfectly understood - If Telegraphy, the Ball will continue while the Triangle does on Snake Island.

### Signals Made from No 2

To Repeat your last Signal, a Ball under the Flag - do you see any thing, a Ball over the Flag at No 2. Send out a Boat to speak or run with, a Ball of Pendant
